*Delivery lead times are based on stock availability at the time of order. Order quantities within the available stock volume, will be delivered within 2-3 working days. Larger order quantities that surpass the available stock, will be delivered within 5-6 weeks.

As well as a natural finish, we are able to offer a range of coating options for enhanced non-stick and protective properties:

Silicone Glaze – A budget friendly option for non-stick requirements, available in clear.

Silicone Rubber – A mid-range priced option for enhanced requirements, available in grey.

Fluoropolymers – A premium priced option where the highest levels of non-stick and protection are required. Several grades are available dependant on individual customer specification. Available in black, green, red and blue.

If a coated finish is required, our technical sales team will discuss your needs to recommend the most appropriate finish. Tailored pricing will be provided based on coating selection and quantity required. Lead times for coated items are dependent on colour and would be confirmed on placement of order.

If you have any further specific requirements, our sales team will be happy to assist with this as well.
